

CURRICULUM VITAE

ANN AZZOPARDI

Senior Sustainability Consultant

Contact | 0427 151 631

aazzopardi@wolfpeak.com.au

Expertise

- Sustainability Management on major infrastructure projects
- Preparing Infrastructure sustainability ratings
- Auditing environment and sustainability management systems
- Environmental planning and assessment
- Preparing environmental management system documentation
- Site environmental management
- Experience in rail, tunneling, water, and energy projects

Qualifications

- Bachelor of Science (Hons), Environmental Science/Geography – University of Sydney
- ISCA IS Accredited Professional (ISAP)
- Lead Auditor in Environmental Management Systems

PROFILE

With 9 years' experience in her field, Ann has acquired skills across the areas of sustainability management, environmental planning and assessment, and site environmental management. Her professional experiences span both the private and public sectors, including working on some of Australia's largest infrastructure projects.

Her expertise includes preparing infrastructure suitability ratings (achieving the highest ISCA rating score awarded to date); developing environmental management systems and sustainability management system documentation; monitoring and assessing compliance through data tracking, auditing, and inspections; preparing and delivering environmental and sustainability training; and working collaboratively with multidisciplinary teams and varied stakeholders to achieve positive environmental, social and economic outcomes.

PROJECTS AWARDS AND ACHEIVEMENTS

Led delivery of the highest ISCA Infrastructure Sustainability rating score ever awarded ('Leading' rating score of 100 out of 110) on the \$2.8b Sydney Metro City & Southwest TSE Works project, which also achieved the following:

- Winner, ISCA Outstanding Achievement in Infrastructure and Sustainability Award 2019
- Winner, Sustainability Initiative of the Year Award 2019, New Civil Engineer Tunnelling Festival and Awards (London)
- Runner Up, Sustainable Construction Award 2019, Australian Construction Awards

PROFESSIONAL MEMEBRSHIP

- National Association of Women in Construction (NAWIC)

RELEVANT PROJECT EXPERIENCE

WolfPeak Environment and Heritage

Senior Sustainability Consultant

February 2020 – Present

Sustainability Manager | CPB Contractors, Regional Rail Project Dubbo Maintenance Facility

- Working with the delivery team designing and constructing the Dubbo Maintenance Facility as part of Transport for NSW's Regional Rail project
- Responsible for implementing the project sustainability management system and meeting sustainability requirements and targets
- Ensuring sustainable decision making is carried out during design development
- Delivering the project's ISCA Design rating submission, targeting a 'Leading' rating score

Sustainability Auditor | Transport for NSW, Transport Access Program (TAP)

- Carried out independent sustainability audits for several station upgrade projects in accordance with AS/NZS ISO 19011, assessing compliance with the ISCA IS Technical Manual and project environment and sustainability requirements

John Holland, Sydney

Project Sustainability Manager

June 2017 – January 2020

Project Sustainability Manager | Sydney Metro City & Southwest Tunnel and Station Excavation Works (\$2.8 billion)

- Managed development and implementation of the project's sustainability management system
- Led delivery of the project's ISCA Infrastructure Sustainability Design, achieving the highest rating score ever awarded ('Leading' rating score 100 out of 110)
- Provided specialist sustainability advice to multidisciplinary teams across the project, including working closely with Senior Management
- Worked collaboratively with the project team to identify and assess sustainability initiatives and programs for adoption on the project
- Managed sustainability monitoring, auditing, and compliance processes and deliverables
- Prepared and delivered sustainability training, workshops and presentations

Sydney Water, Sydney

Environmental Scientist

October 2014 – June 2017

Environmental Scientist | Various Projects

- Provided environmental management advice to project teams, and made decisions regarding environmental planning, environmental management, and sustainability aspects of projects
- Managed the preparation of environmental impact assessments for a variety of water and wastewater infrastructure construction, maintenance, and renewal projects
- Prepared a comprehensive Pollution Reduction Program report for the NSW EPA regarding wastewater outfalls at Vaucluse and Diamond Bay. This led to a decision to redirect untreated wastewater away from these ocean outfalls and transfer it to the Bondi Wastewater Treatment Plant.
- Conducted environmental risk assessments and monitored environmental compliance through leading audits and site inspections

John Holland, Sydney

Environment Coordinator

January 2012 – October 2014

Approvals and Site Environment Coordinator | Sydney Metro Northwest Tunnels and Stations Civil Works (\$1.5 billion)

- Assisted with the preparation of environmental and sustainability documentation as part of the successful tender team
- Coordinated environmental management during project delivery at three Worksites, providing advice, guidance, and support to the Construction Teams
- Assessed environmental compliance through inspections and auditing, and managing the Compliance Tracking Program for the project's Conditions of Approval
- Developed and implemented an in-house method of preparing Site Environment Plans and Premise Maps using geographic information system software (ArcGIS)
- Provided support to the Sustainability Manager in collecting and collating environmental data for the project's ISCA sustainability rating submission

Site Environment Coordinator | Glenfield to Leppington Rail Line (\$500 Million)

- Provided advice, guidance and support to the Structures Team on relevant environmental statutes, legislation, regulations, and project requirements
- Worked collaboratively with multidisciplinary teams to identify and implement environmental mitigation practices in accordance with project planning approvals, permits, and licences
- Conducted environmental inspections and other compliance monitoring processes
- Prepared and updated EMS documentation, including risk assessments
- Communicated environmental requirements through site inductions and toolbox talks

AusGrid, Sydney

Environment Officer

January 2009 – June 2009

Environment Officer | Various Projects

- Supported the Environmental Services team in the areas of environmental impact assessment, planning approvals, and training preparation
- Conducted desktop environmental impact assessments and prepared environmental approvals documentation, including Review of Environmental Factors
- Developed online environmental training programs for the business
- Liaised with multidisciplinary teams and external stakeholders
