Contact | 0404 536 745

vgillies@wolfpeak.com.au

Expertise

- Environment Project Management
- Environmental Compliance
- Environmental approvals and Management Plans
- Contaminated site investigations
- Environmental site monitoring
- Occupational Hygiene monitoring
- Asbestos management

Qualifications

- Bachelor of Environmental Science (Chemistry) (Honors), University of NSW
- Master of Planning (Environmental), Macquarie University – To be completed in 2021

PROFILE

Vincent is a skilled environmental consultant with over 6 years' experience in environmental project management and contaminated lands, working on a broad range of projects, with proficiency in GIS and sustainability. He has experience in environmental compliance management, the development and implementation of environmental management plans, site environmental management and monitoring, contaminated site investigations, remediation, occupational hygiene and asbestos management.

Vincent has a pragmatic and proven approach to project management and solving environmental issues, liaising with a range of stakeholders including consultants, subcontractors, state and local government, construction and project teams, with the ability to deliver positive outcomes for clients.

Vincent is currently undertaking a Master of Environmental Planning and is keenly interested in applying sustainable and environmentally responsible solutions in construction, urban and rural settings.
